1. Product Overview

1.1. Application description

Visio by Apitech is a web-based video conferencing application that allows users to hold professional meetings, online classes, or informal discussions.

The application offers intuitive features such as screen sharing, random generation of meeting names, chat, and simplified participant management.

It also provides advanced features such as video recording, transcription, a collaborative whiteboard, and the creation of polls. It is also possible to attend the conference via phone call.

1.2. Target audience

Visio by Apitech is primarily intended for professionals, educators, remote teams, and individuals looking for a reliable and easy-to-use video conferencing solution.

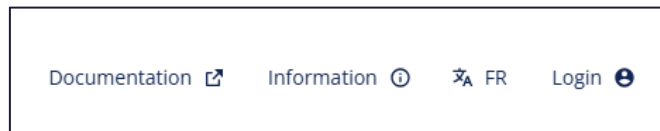

1.3. Prerequisites

Optimized for Chromium-based browsers (Google Chrome, Microsoft Edge, Brave, Opera, Vivaldi, etc.).

2. Interface overview

2.1. Main page

If you are not logged into the video conferencing module, the submenu will not appear, and you can log in to the platform using the “Login” button.

From the main menu, you can:

- Download this user documentation via the “User Documentation” button.
- View information about available module versions by clicking the “Information” button, which opens the “Service Versions” popup.
- Log in or log out of your user account.

From the main menu, you can switch the application to English by clicking the “EN” button.

This will translate the Visio by Apitech interface into English or French.

Accessibility : Fully compliant | Legal notice |  Display settings

From the footer, you can change the display settings of Visio by Apitech by clicking “Display Settings” and selecting Light, Dark, or System mode.

You can also view the legal notices via the “Legal Notice” link.

Once logged in, a submenu becomes available, allowing navigation through the different pages of the application.

Note that the “Administration” and “Dashboard” pages are only accessible to users with the “Administrator” role.

[Home](#)[My account](#)[Conferences](#)[Dashboard](#)

You can create a conference at any time by entering its name and clicking “Join or create a video conference.”

Join a video conference

Voxify Version

New version 09/25/2025

The latest version 1.6.3 from April 15, 2025 brings fixes.
This new version notably includes:

- Complete dashboard with 3 sections: real-time statistics, history, and poll results.
- Real-time statistics: concurrent participants, concurrent conferences, average participants/conference.

The “Service Versions” popup displays the latest changelog versions of the services available on your Visio by Apitech instance.

You can view older changelogs by clicking “See more.”

Accessible from the submenu, this page lists your past video conference recordings along with their dates.

You can download recordings in .mp4 format

2.5. Dashboard Page (Administrators Only)

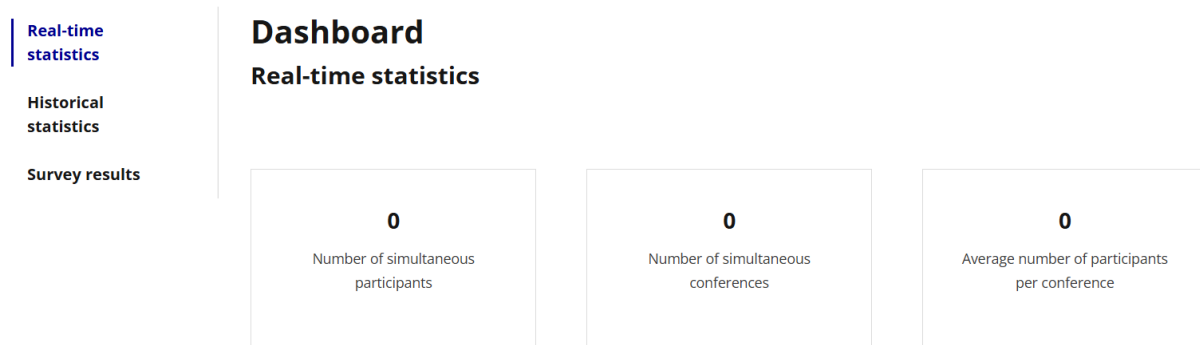

The dashboard allows you to analyze key activity data through:

- Real-time statistics
- Historical statistics

- Quality survey results

2.5.1. Real-Time Statistics

[Accueil](#) > [Dashboard](#)

Real-Time Statistics include:

- Number of simultaneous participants
- Number of simultaneous conferences
- Average number of participants per active conference

3. Main Video Conference Usage

3.1. Pre-Join Page

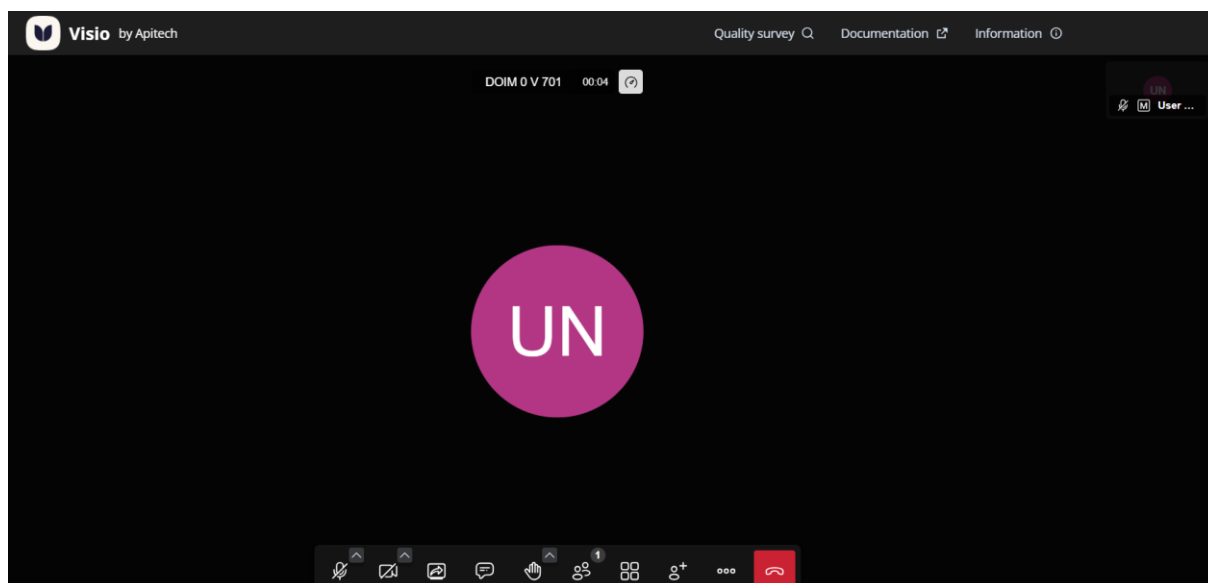

Before joining a conference, a pre-join page may appear depending on your installation.

You can:

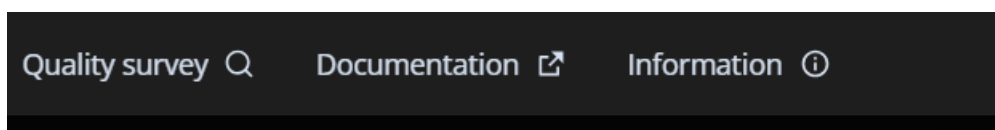

- Enter your username
- Join with or without microphone
- Test microphone and camera
- Invite participants
- Change camera background
- Access notification, profile, shortcut, and settings options

3.2. Video Conference Interface

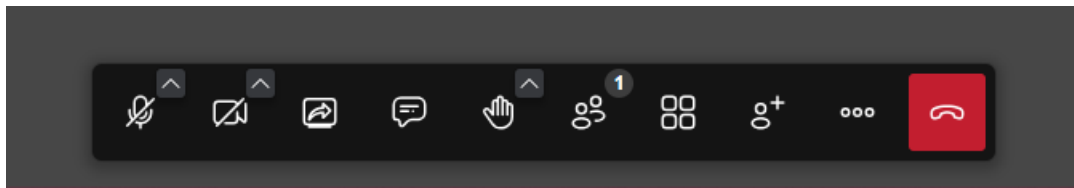

The conference page includes:

- A top menu bar for navigation and access to documentation and service versions

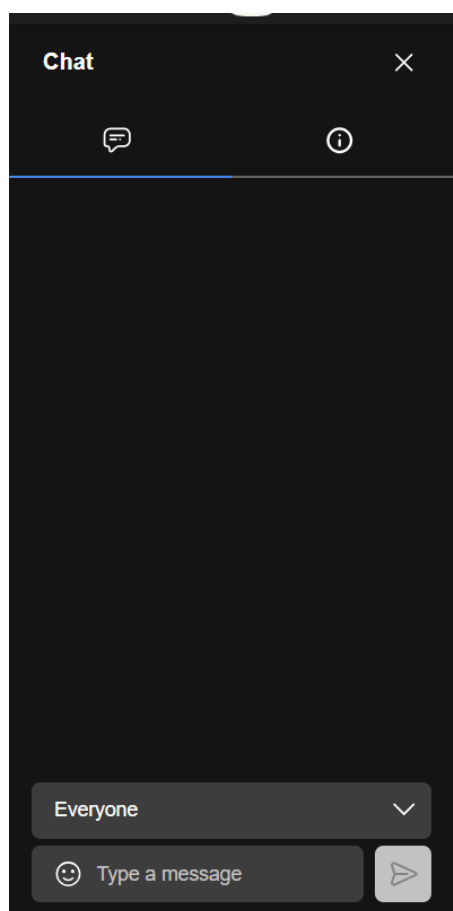

A bottom control menu allowing you to:

- Leave the conference
- Enable/disable microphone and camera
- Share your screen
- Raise your hand or send reactions
- Use chat and create polls

You can create or answer polls directly from the poll menu.

Once completed, polls can be shared with all participants

3.3. Quality Survey

During and after a conference, users can complete a quality survey.

It opens in a new tab during the meeting or in the same tab once the meeting ends.

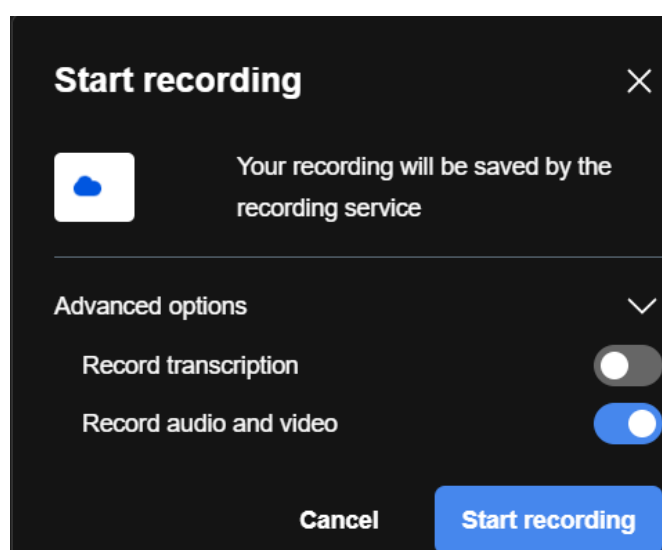

4. Video Recording

Only moderators can start a video recording.

Recording can be launched from the “...” menu.

A notification appears when recording starts, and participants must give consent.

Recordings can be downloaded once processing is complete.

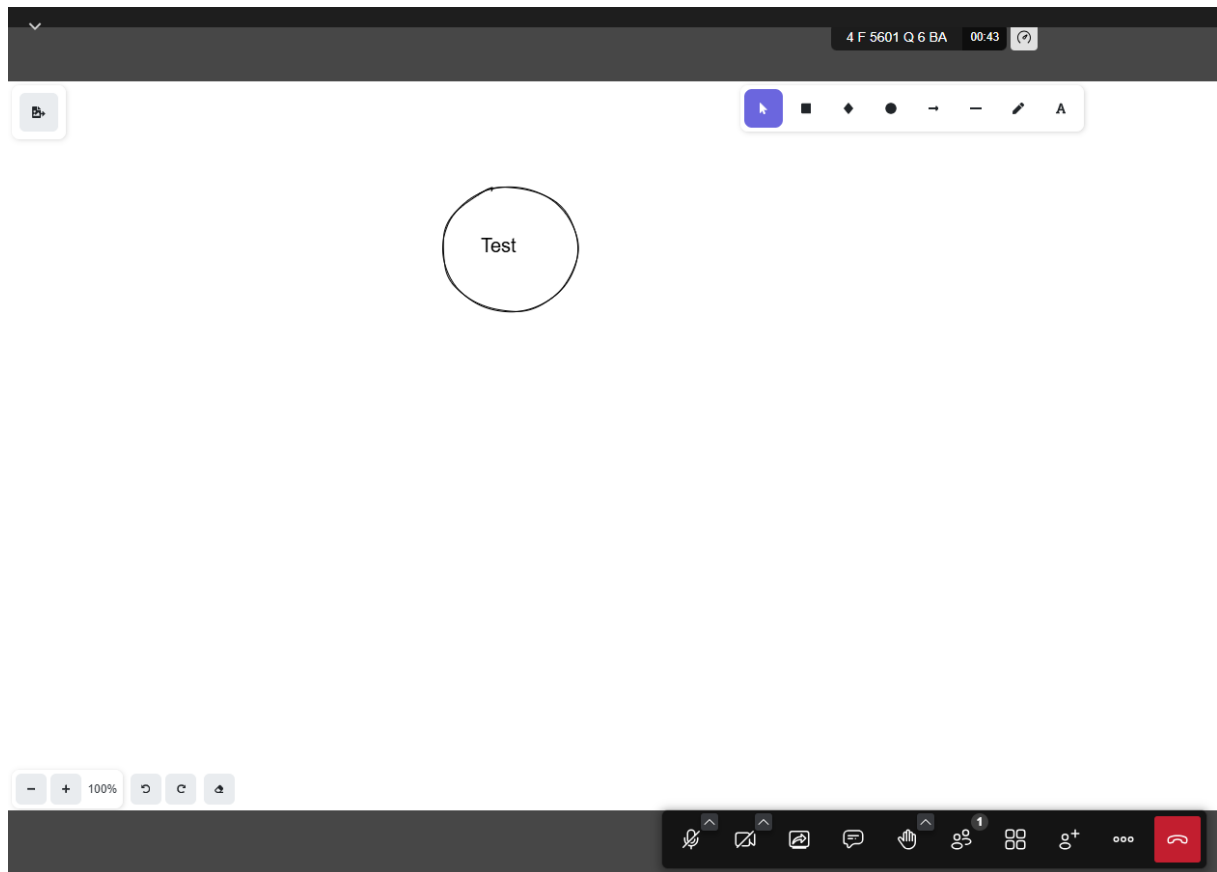

<https://youtu.be/9bDkiFfHqv0>

5. Collaborative Whiteboard

Only moderators can open the collaborative whiteboard.

All participants can view and interact with it once enabled.

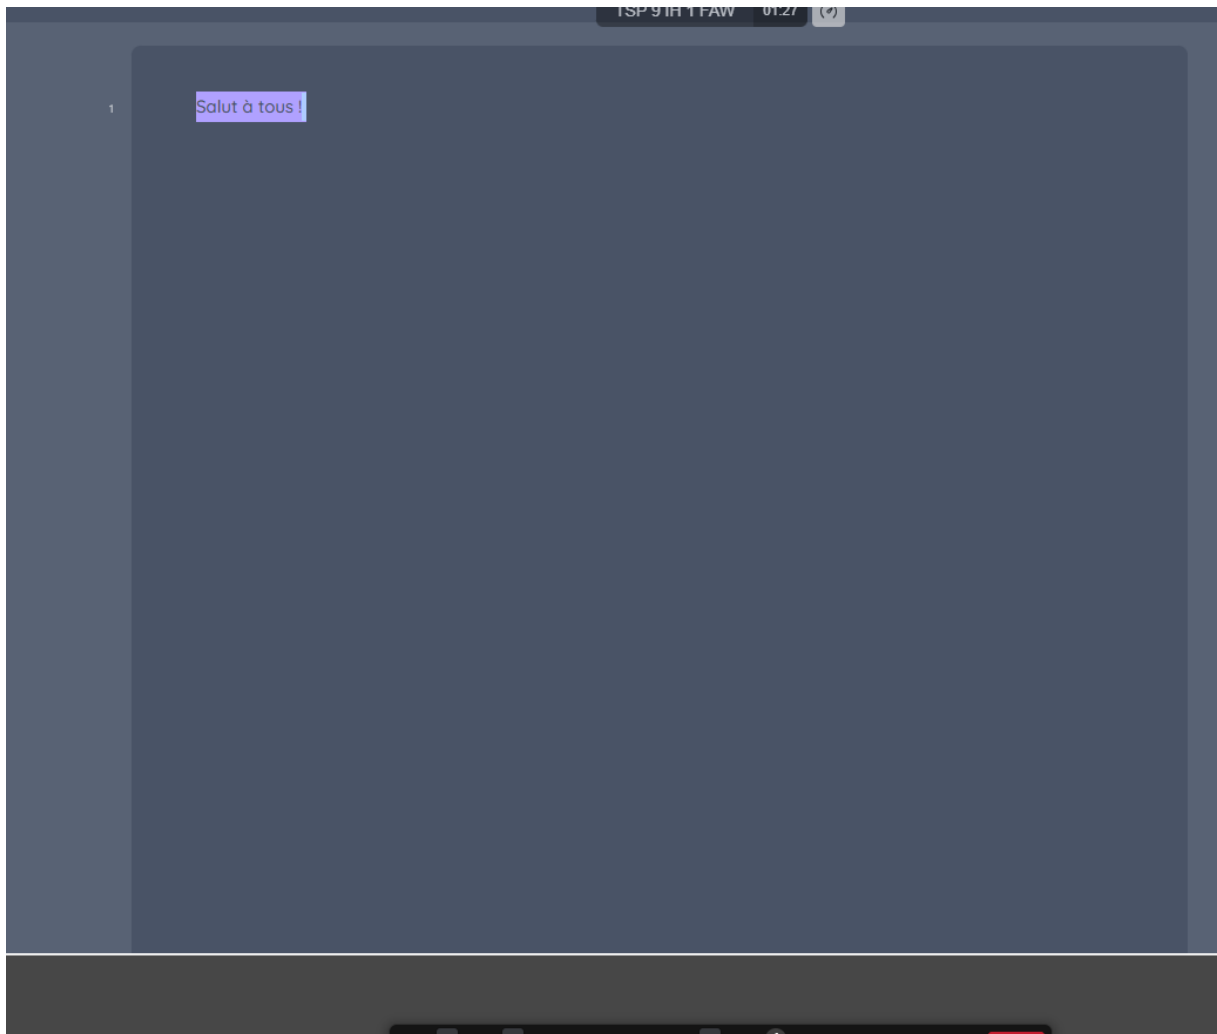

<https://youtu.be/FQvOqLzuyKk>

6. Shared Document

Only moderators can open the shared document.

All participants can collaborate on it once opened.

7. Webinare

You can access the webinar mode by clicking the following button available on the home page:

Join a webinar

Audio, video, chat, screen and document sharing

Create and share a webinar

✔ AT LEAST 3 DIGITS

✔ BETWEEN 3 AND 12 CHARACTERS

✔ DIGITS AND LETTERS WITHOUT ACCENTS

1 CURRENTLY, THERE ARE 0 CONFERENCES AND 0 PARTICIPANTS.

The method for entering a webinar name is the same as for a standard videoconference. (See section 2.1)

7.1. Creating a Webinar

You can easily create and share a webinar by clicking the “Create and share a webinar” button after entering its name.

A pop-up window will then open.

Close ×

Create and share a webinar

Webinar name: M8PL84V99P

Copy participant link to share with hosts

Copy visitor link to share with visitors

Enter the webinar now

Finish

You will be able to:

- Copy and share the **presenter link** (a participant who can talk, share their screen, and use their camera during the webinar).
- Copy and share the **viewer link** (a participant who cannot talk, share their screen, or activate their camera during the session).

If you have an account and are logged in, you can enter the webinar directly using the button provided.

You will automatically join as a presenter.

The number of visitor participants in your webinar is displayed at the top of your screen, highlighted in yellow.

7.2. Features available to viewers

By default, a presenter has the same rights as a standard authenticated moderator in a classic videoconference (outside webinar mode).

However, a viewer **can only**:

- Send messages in the webinar chat
- Raise their hand to request to speak
- Access a few additional basic features, such as changing their display name (See section 8: Additional videoconference features)

7.3. Managing roles in the webinar

7.3.1. From viewer to presenter

If you are a presenter, you can easily change a viewer's role during the webinar.

To promote a viewer to a presenter, follow these steps:

1. The viewer must raise their hand using the appropriate button.
2. The moderator will receive a notification.
3. If the request is declined, the viewer remains a viewer. If approved, the viewer becomes a presenter, becomes visible to all, and can speak.

7.3.2. From presenter to viewer

If you are a presenter, you can also demote another presenter to the viewer role.

1. The presenter must open the “Participants” panel from the bottom menu. They will see all current presenters and moderators.
2. By hovering over the presenter’s name, they can select **“Move to viewer”** (noting that Jitsi refers to a viewer as a “visitor”).
3. Once this is done, the participant becomes a viewer again, becomes invisible to others, and can no longer speak.

7.4. Features available to webinar users

7.4.1. *Authenticated presenter (moderator)*

An authenticated presenter has the same permissions as a standard moderator in a classic videoconference.

They can also change the roles of other participants. (See section 7.3)

7.4.2. *Presenter*

A presenter (not necessarily authenticated) has the same abilities as a standard participant in a classic videoconference.

7.4.3. *Viewer*

A viewer:

- Cannot speak
- Cannot activate their camera
- Cannot share their screen

They can only:

- Send messages in the chat
- Answer polls
- Raise or lower their hand to request a role change

If granted by a moderator, they can then take the floor and become a presenter.

8. Additional Features

- Share a video or audio
- Participant management and moderation tools
- Breakout rooms
- Performance settings
- Security options (waiting room, password)
- Noise suppression
- Camera background customization
- Additional statistics (speaking time, reactions)
- Keyboard shortcuts
- General audio, video, notification, and profile settings
- HTML integration of conferences
